ABSTRACT

A national survey of 136 member institutions in the 50 states, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands shows fall 1976 enrollment at state and land-grant universities at 3,249,117, or 29 percent of all students enrolled in U.S. higher education. Complete enrollment data, including breakdowns by level of full- and part-time students, enrolled both on campus and in extension programs, are provided. They show that: undergraduate students accounted for 75.4 percent of the enrollment and graduate students, 15.8 percent; there were drops in enrollment at all levels except for first-professional schools when figures for CUNY were included in the comparisons; there were major gains in the enrollment of women; the percentage of students who were part-time increased from 25.1 to 25.9 percent from 1975 to 1976; a supplementary questionnaire showed a decrease of 5.1 percent in the number of extension students; on-campus enrollment for the 98 campuses for which it was possible to compare both extension and on-campus enrollment showed almost exactly the same changes as that reported for total enrollment. ENROLLMENT AT STATE UNIVERSITIES AND LAND-GRANT COLLEGES
FALL 1976

Contact: Ione Phillips or Kelly Seifert
(202) 293-7120

A national survey shows fall, 1976 enrollment at state and land-grant universities at 3,249,117, or 29 percent of all students enrolled in U.S. higher education.

The National Association of State Universities and Land-Grant Colleges (NASULGC) conducted the survey of its 136 member institutions, which include the nation's principal state universities and land-grant colleges in the 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands.

Comparative data provided by 130 of the respondents, including 356 campuses, for the years 1975 and 1976 showed a slight 1.7 percent dip in enrollment from 3,189,546 in the fall of 1975 to 3,134,431 in the fall of 1976. Yet this decrease is almost eliminated when figures for the 20-campus City University of New York (CUNY), a member of NASULGC, are omitted from comparisons. CUNY lost more than 50,000 students in the fall of 1976 as it was forced to drop its policies of open admissions and free tuition.

Complete enrollment data, including breakdowns by level of full- and part-time students, enrolled both on campus and in extension programs, were provided by 132 of the 136 NASULGC member institutions. The four additional institutions which did not respond to the survey in detail were contacted for the total enrollment figures.[1] The 132 universities which responded recorded an enrollment of 3,183,976 for 363 campuses.

Figures for NASULGC institutions, omitting CUNY, showed an enrollment decrease of only .16 percent, from 2,938,328 to 2,933,698. This was slightly less than the 0.7 percent drop in enrollment for all colleges and universities in fall, 1976 estimated by the National Center for Education Statistics (NCES).

Enrollment information for state and land-grant universities was compiled by the Association's Office of Research and Information from data provided to NCES as part of the Higher Education General Information Survey (HEGIS). Requested information from which data on total enrollment and enrollment by level were derived represents a head count of both on-campus and extension students, full-time and part-time.

(The chart below shows total enrollment and enrollment by level. The numbers in parentheses below each heading refer to the number of campuses reporting enrollment for the level. All survey respondents provided enrollment data categorized by level, but all campuses did not have students in every level.)

ENROLLMENT AT STATE UNIVERSITIES AND LAND-GRANT COLLEGES

FALL 1976

TOTAL	UNDERGRADUATE	UNCLASSIFIED	GRADUATE	FIRST-PROFESSIONAL
(363)*	(355)	(251)	(226)	(91)
3,183,976[1]	2,395,481 (75%)†	199,561 (6%)	503,729 (16%)	80,407 (3%)

*Number of campuses †Percentage of total enrollment

[1] Includes 4,798 students from five campuses that were not broken down by level.

SURVEY HIGHLIGHTS

*Undergraduate students accounted for approximately three-fourths (75.4%) of the enrollment while graduate students comprised 15.8 percent. This represented an increase in the percentage of undergraduate students and a corresponding decline in graduate students compared with fall, 1975. Of the remaining students, 2.5 percent were enrolled in professional schools while 6.3 percent were unclassified.

*There were drops in enrollment at all levels with the exception of first-professional schools when figures for CUNY were included in NASULGC comparisons. However, when figures for CUNY were omitted, undergraduate enrollment remained at a standstill level, up .03 percent, and the number of unclassified students rose 4.4 percent.

*Major gains in the enrollment of women provided one of the few bright spots in the enrollment picture. Women accounted for 44.5 percent of the enrollment on NASULGC campuses in fall, 1976 compared with 43.6 percent in fall, 1975. There were 1,696,250 men and 1,415,731 women students along with an additional 67,865 extension students who were not classified by sex and 4,130 students who were not classified in any way.

The proportion of the enrollment accounted for by women increased at the undergraduate, graduate and first-professional levels and remained unchanged at the unclassified level where women already account for more than half of the enrollment.

*The percentage of students who were part-time increased from 25.1 percent of the total enrollment in fall, 1975 to 25.9 percent in fall, 1976. Reports on enrollment by full-time/part-time status from all survey respondents showed that there were 2,290,181 full-time and 821,800 part-time students. An additional 67,865 extension students, presumably almost completely part-time, along with 4,130 other students, were not classified by status.

*A supplementary NASULGC questionnaire designed to separate extension students from the total enrollment showed a dip of 5.1 percent in the number of extension students. Information from 112 campuses showed a total extension enrollment of 161,691, representing 5.1 percent of the total reported enrollment, down from 5.3 percent in fall, 1975.

*On-campus enrollment for the 98 campuses for which it was possible to compare both extension and on-campus enrollment showed almost exactly the same change as that reported for total enrollment. (Neither comparison included data for CUNY.) On-campus enrollment for those campuses was down only .18 percent from 1,286,812 to 1,284,432.

FEW REASONS GIVEN
FOR ENROLLMENT DROPS

Survey respondents did not provide much insight into the reasons behind the decreases. Enrollment quotas, increases in student charges and less interest in attending college were the three reasons most frequently cited for the enrollment slowdown.

However, the largest number of campuses checking any one reason for declines was 27, the number of campuses listing quotas as a deterrent to increases. Yet, among the 356 campuses providing comparative information on their total enrollment, 181 showed a decrease.

Other reasons cited by a few campuses were: the growth of enrollment at vocational-technical schools, decreases of the college-age population and the increasing number of students who start their educations at community colleges. Many campuses with decreases did not cite any reasons for the drops.

The chart below shows the number of campuses reporting drops in each level.

DECREASES IN ENROLLMENT BY LEVEL

LEVEL	# OF CAMPUSES	LEVEL	# OF CAMPUSES
Undergraduate	177	Extension (Total)	57
First-Time Freshmen	161	Undergraduate Extension	37
Unclassified	93	Unclassified Extension	19
Graduate	131	Graduate Extension	52

The number of campuses showing decreases for fall, 1976 contrasted drastically with fall, 1975 when only seven state and land-grant university campuses had drops in total enrollment.

MAJORITY OF ENROLLMENT DROPS
WERE SMALL FOR LARGE CAMPUSES

Many of the losses in total enrollment were quite small, especially in light of the large enrollments of most state and land-grant university campuses. Approximately a third of the 181 reported decreases in total enrollment (64) represented drops of 100 students or less. An additional 58 were within the 101-500 range. Twenty-six campuses had decreases between 501-1,000 while the remaining 33 reported losses in total enrollment of more than 1,000 students.

Among the 33 campuses with drops of more than 1,000 students, 13 were CUNY campuses. Fourteen of the remaining campuses had enrollments of more than 20,000 despite drops. Of the remaining six, three had enrollments of more than 10,000 and three were below 10,000. The smallest enrollment for a campus with a loss of more than 1,000 students was 5,769.

Drops in extension enrollment contributed disproportionately to the enrollment drop on 24 campuses. When extension data was eliminated from comparisons for those campuses, 13 showed increases and 11 had decreases which were significantly smaller than they were with the inclusion of extension data.

RECRUITMENT, NEW TYPES OF STUDENTS
BOLSTER ENROLLMENTS ON SOME CAMPUSES

The primary reason cited for increases by the 175 campuses which did not experience drops in enrollment was the enrollment of more part-time students. Thirty-seven campuses said that this had been a factor in bolstering their fall, 1976 enrollments.

Successful recruitment programs were cited by 22 campuses while 20 campuses mentioned increases in graduate enrollments, despite the overall decline in this category. The enrollment of more older students was also mentioned by 19 campuses. The establishment of new programs and the shortage of jobs were each given as reasons for increases by a few respondents.

LARGEST DECREASES REPORTED
FOR GRADUATE, FIRST-TIME STUDENTS

A comparison of enrollment for each level showed that the largest drops in enrollment came in the enrollment of first-time and graduate students. This applied whether or not data for CUNY was left in the comparisons.

The enrollment of first-time freshmen was down 5.9 percent for the 227 campuses providing figures for both years. Graduate enrollment slumped 4.2 percent, according to data from 204 campuses. When CUNY data was omitted from comparisons, the decreases shrunk to 3.5 percent and 3.0 percent respectively.

Undergraduate enrollment, which showed a drop of 1.5 percent when information for CUNY was included, increased .03 percent when CUNY campuses were excluded from comparisons. Unclassified students increased 4.4 percent with CUNY comparisons omitted compared to a 2.8 percent drop when those campuses were included. The change in first professional enrollment remained the same -- an increase of 1.9 percent -- in either comparison.

(The chart at the bottom of the page shows comparative figures by level both with and without CUNY figures included.)

RE-CLASSIFICATION OF STUDENTS
COMPLICATES SOME COMPARISONS

A problem created by instructions accompanying this year's HEGIS questionnaire complicated comparisons of unclassified and graduate students. The addition of a category for post-baccalaureate level unclassified students caused many campuses to move large numbers of students taking graduate work but not working toward a formal degree, all

[1]Figures include information for all member institutions providing comparative data.

[2]Figures include information for member institutions providing comparative data, omitting the City University of New York. See copy, page one.

formerly reported as graduate students, into the new unclassified category. As a result, original comparative data for graduate students showed an unusually large decrease while data for unclassified students showed a large increase.

In order to make data more comparable, ORI contacted all campuses showing especially large graduate enrollment drops to ascertain if they had re-classified students to fit into the new category. Sixty-four campuses contacted indicated that they had re-classified students. As a result, it was necessary to change figures reported by those campuses in these two categories to make them comparable with 1975 data.

Therefore, comparative figures used for these two categories for the sixty-four campuses which changed their method of classification differ from data shown on the chart in the back of this report. The data shown on the chart in the back appears exactly as it was reported on the HEGIS questionnaire. All campuses for which changes were made in comparable data are footnoted accordingly.

Although every campus with especially large shifts in graduate and unclassified categories was contacted, additional campuses may also have made such a change with less dramatic results. A certain margin of error must thus be assumed in comparisons within these two categories. These shifts, however, do not affect total enrollment.

MAJOR INCREASES REPORTED
IN ENROLLMENT OF WOMEN

Although information on which exact comparisons were based did not include data on enrollment by sex, a comparison of the percentage of women reported in the total enrollment and for each level in fall, 1976, with the percentage reported by participants in the fall, 1975 survey, showed major increases in college attendance by women. The percentage of women increased by three points at the undergraduate, graduate and first-professional levels.

Women now represent almost 25 percent of the first-professional enrollments at state and land-grant universities -- an area which has been the focus of much concern for women's and affirmative action groups. In fall, 1975, they made up only 21.8 percent of first-professional students. There were 20,032 women and 60,375 men enrolled in first professional schools at the ninety-one campuses of state and land-grant universities offering such programs.

At the graduate level, the number of women students accounted for 42.9 percent of the enrollment compared with 39.8 percent in fall, 1975. There were 196,105 women and 261,498 men graduate students at the 224 campuses reporting graduate enrollments.

Women continued to edge toward the 50 percent mark in undergraduate schools. There were 1,276,596 men and 1,098,691 women undergraduates at state and land-grant universities in fall, 1976 with women making up 46.3 percent of the total undergraduate enrollment. In fall, 1975, women comprised 43.5 percent of the undergraduate enrollment.

Among unclassified students, women continued to represent slightly more than half of the total enrollment. There were 100,903 unclassified women students, or 50.8 percent of the total, and 97,781 men.

Because many students formerly classified as graduate students were moved into the unclassified category for the first time this year (as explained in the previous section), figures on enrollment by sex for those two categories should differ slightly from past years' reports. Although total comparative data was changed, it was impossible to adjust information by sex.

An analysis of enrollment by level, sex and status showed that women are slightly more likely than men to attend college on a part-time basis. Of the total part-time enrollment of 821,800, 50.8 percent of the students were women.

On the other hand, men were in the majority in full-time enrollments. They comprised 56.4 percent of all full-time students.

(The chart to the right shows enrollment for each level, classified by sex and status.)

EXTENSION ENROLLMENTS SHOW SUBSTANTIAL SLUMP

Extension enrollment in credit courses appeared to suffer a substantial slump in fall, 1976. However, because of difficulties experienced by most campuses in keeping an unduplicated count of these special students, figures on such enrollments must be allowed a certain margin of error.

The reported extension enrollment decrease for NASULGC institutions was based on data from 98 campuses which reported extension enrollment of 154,228 in fall, 1976 compared with 162,559 in fall, 1975.

The largest reported decrease came in graduate extension enrollments, which were down 6.4 percent according to data from 72 campuses. Enrollments dropped on those campuses from 73,353 in fall, 1975 to 68,673 in fall, 1976. However, this apparent drop may be inflated because of the switch of many graduate students to the unclassified category. It was not possible to determine the number of graduate students which were extension students on the campuses which indicated that they had changed the classification of certain students from graduate to unclassified.

Nevertheless, unclassified enrollments also showed big losses on the forty-five campuses reporting extension students in this category. The number of students dipped from 23,321 to 22,166, a five percent drop.

Undergraduate extension enrollments offered the only bright spot in the extension figures, rising 3.9 percent from 56,008 to 58,212 on the 62 campuses providing compara ble information.

A breakdown of total extension enrollments reported by level showed that there were 61,873 undergraduates, 25,584 unclassified students and 72,032 taking graduate courses. An additional 2,202 extension students were not classified by level.

On-campus enrollment comparisons for those campuses providing separate data on their extension enrollment showed decreases in both undergraduate and graduate enrollments. The biggest slump was in graduate enrollment, which dropped 2.7 percent from 180,619 to 175,739. Undergraduate enrollments dropped 1.1 percent from 754,750 to 746,362. Unclassified enrollments rose 5.6 percent, moving up from 16,304 to 17,216.

RANKING OF LARGEST UNIVERSITIES SHOWS LITTLE CHANGE IN FALL, 1976

NASULGC members include most of the largest colleges and universities, in terms of enrollment, in the nation. A listing of both the largest institutions (including) all campuses) and the largest single campuses for fall, 1976 in most categories varied very little from previous years' reports.

The top ten institutions in total enrollment were exactly the same as in fall, 1975. All had enrollments of more than 60,000. The ten largest campuses included eight of the same campuses listed in the fall, 1975 report. Rank order changed considerably, however, due to the fact that fall, 1976 data included extension data for most campuses while fall, 1975 data did not. The two newcomers to the list--the University of California, Los Angeles (2) and Pennsylvania State University, University Park (6)--both reported large extension enrollments.

(The chart to the right shows the ten largest NASULGC institutions and the ten largest campuses.)

TOTAL ENROLLMENT
FALL 1976

LARGEST INSTITUTIONS		LARGEST CAMPUSES	
State University of New York	341,096	University of Minnesota, Twin Cities	64,161
City University of New York	200,733	University of California, Los Angeles	57,515
University of California	179,431	Ohio State University, Columbus	49,846
University of Wisconsin System	133,213*	Michigan State University, East Lansing	47,796
University of North Carolina	108,103	University of Texas, Austin	41,387
University of Texas System	86,278	Pennsylvania State University, University Park	38,691
Indiana University	77,948	University of Michigan, Ann Arbor	36,863
University of Minnesota	75,854	University of Maryland, College Park	36,761*
Pennsylvania State University	67,137	University of Wisconsin, Madison	36,327*
University of Illinois	60,445	University of Washington, Seattle	35,277

*Figures do not include degree-credit extension enrollment

Nine of the ten institutions with the largest total enrollments were also included in the listing of the ten institutions with the largest undergraduate enrollments. Ohio State University (9) replaced the University of Illinois as the tenth institution on the listing.

Eight of the ten campuses with the largest total enrollments were also among the top ten in undergraduate enrollment, although, as with total enrollment, rank order changed in most cases. The University of Houston, Houston (5) and the University of Illinois, Urbana-Champaign (10) were also included on the listing. Houston and the University of California, Los Angeles (6) were listed for the first time this year.

(The chart below shows the ten institutions and campuses with the largest undergraduate enrollments.)

Eight of the ten institutions on the other top ten lists also were included among the institutions with the largest graduate enrollments. However, rank order differed completely from the top ten total enrollment list. The University of California had the largest combined graduate enrollment -- almost double the number of graduate students reported by second-ranked State University of New York (SUNY). Over half of the reported 66,548 graduate students were enrolled in extension programs.

UNDERGRADUATE ENROLLMENT
FALL 1976

LARGEST INSTITUTIONS		LARGEST CAMPUSES	
State University of New York	306,027	University of Minnesota, Twin Cities	45,403
City University of New York	153,743	Ohio State University, Columbus	38,388
University of California	104,815	Michigan State University, East Lansing	35,561
University of Wisconsin System	103,911*	University of Texas, Austin	32,415
University of North Carolina	81,580	University of Houston, Houston	27,977
University of Texas System	67,123	University of California, Los Angeles	26,280
Indiana University	54,128	Pennsylvania State University, University Park	26,037
University of Illinois	43,754	University of Maryland, College Park	25,895*
Ohio State University	42,894	University of Wisconsin, Madison	24,882*
Pennsylvania State University	42,741	University of Illinois, Urbana-Champaign	24,551

*Figures do not include degree-credit extension enrollment

Topping the list of the ten campuses with the largest graduate enrollment was the University of California, Los Angeles with a reported enrollment of 29,264 including 19,390 graduate extension students. The remaining nine institutions had enrollments ranging from 11,772 for the University of California, Berkeley to 8,691 for Ohio State University, Columbus. As with undergraduate enrollment, the inclusion of graduate extension students had considerable effect upon the rank order but all but one of the top ten, Pennsylvania State University, University Park (9) were also on the fall, 1975 listing of the ten campuses with the largest graduate enrollments.

(The chart to the right shows the ten institutions and campuses with the largest graduate enrollments.)

GRADUATE ENROLLMENT

Pennsylvania State University	12,288	Pennsylvania State University, University Park	8,740
University of Minnesota	11,583	Ohio State University, Columbus	8,691

*Figures do not include degree-credit extension enrollment

Despite its large enrollment drop, the City University of New York still topped the list of institutions with the largest number of first-time freshmen, with almost 7,000 more first-time students than the second-ranked University of Wisconsin System.

The only new addition to the listing in fall, 1976 was the University of Puerto Rico (6). Purdue University, which did not appear in any of the other top ten lists, ranked eighth in the number of beginning freshmen.

The same ten campuses which reported the largest numbers of first-time freshmen in fall, 1975 did so in fall, 1976 although rank order changed somewhat.

(The chart to the right shows the ten institutions and campuses with the largest enrollments of first-time students.)

FIRST-TIME FRESHMEN ENROLLMENT
FALL 1976

LARGEST INSTITUTIONS[1]		LARGEST CAMPUSES	
City University of New York	29,061	Michigan State University, East Lansing	6,978

University of Illinois	9,143	University of Pittsburgh, Pittsburgh	4,644

[1]State University of New York did not provide data for first-time freshmen enrollment.

The ten institutions with the largest number of women students were almost identical to fall, 1975. Pennsylvania State University, which did not appear on the top ten listing last year, ranked ninth in fall, 1976. Seven of the ten campuses with the largest enrollments of women in fall, 1975 continued to be among the leaders in fall, 1976. Three campuses of the City University of New York which were among the top ten in fall, 1975 did not make the list in fall, 1976. The three new campuses taking their place were: Pennsylvania State University, University Park (6), University of Michigan, Ann Arbor (9) and Indiana University, Bloomington (10).

(The chart to the right shows the ten institutions and campuses with the largest enrollments of women.)

City University of New York	107,679	Michigan State University, East Lansing	22,937
University of Wisconsin System	62,127*	Ohio State University, Columbus	21,359
University of California	55,138	University of Texas, Austin	17,908
University of North Carolina	50,976	University of Maryland, College Park	17,271*
Indiana University	37,675	Pennsylvania State University, University Park	16,610
University of Texas System	36,116	University of Wisconsin, Madison	16,217*
University of Minnesota	34,305	Arizona State University, Tempe	15,433
Pennsylvania State University	27,143	University of Michigan, Ann Arbor	15,416
University of Illinois	23,718	Indiana University, Bloomington	14,962

*Figures do not include degree-credit extension enrollment.

Extension enrollments, which are shown as combined figures for all campuses of an institution, were quite small with a few major exceptions. However, some institutions with sizeable extension enrollments are not included in the listing. The most notable omission is the University of Wisconsin System, which was not able to provide any data on degree credit extension enrollment.

The University of California, with 49,267 extension students, ranked first in the listing of the ten largest institutions. Three other institutions -- University of Minnesota, Pennsylvania State University and the University of Maryland -- reported enrollments between ten and twenty thousand with the fifth-ranked institution, Michigan State University, reporting an enrollment of 4,047. All other institutions had enrollments of less than 4,000 students.

(The chart to the right shows the ten institutions with the largest extension enrollments.)

EXTENSION ENROLLMENT
FALL 1976

LARGEST INSTITUTIONS

University of California	49,267
University of Minnesota	19,707
Pennsylvania State University	13,775
University of Maryland	12,123
Michigan State University	4,047
University of North Carolina	3,660
University of Delaware	3,616
University of Rhode Island	3,392
University of Nebraska	3,198
University of Colorado	2,851

[1] Member institutions which are not included in survey data include: Alcorn State University, University of Oregon, Prairie View A&M University and Connecticut Agricultural Experiment Station. Total enrollment data for these institutions, with the exception of the Connecticut Agricultural Experiment Station which does not have student enrollment, are included in the estimated grand total enrollment figure. Data for 27 additional campuses, which are part of multi-campus institutions which provided survey data for some but not all campuses of their institution, is also included in the estimated grand total figure.

ENROLLMENT AT STATE UNIVERSITIES AND LAND-GRANT COLLEGES
FALL 1976

(Extension enrollment is included in figures unless otherwise indicated.)

---

[1]Information available by total enrollment only.

[2]Total includes additional students not classified by level.

[3]Extension enrollment not included.

[4]Information available by undergraduate level only.

[5]Extension enrollment included in total only.

[6]Includes endowed and statutory colleges.

*Data for these two categories differ from past reports as a result of the re-classification of students taking graduate work but not working toward a formal degree, formerly included in graduate data, as post-baccalaureate unclassified students. Figures used in comparisons were changed to correspond to 1975 enrollments reported for these categories.
